"Your book "New Nurse, How to Get, Keep and LOVE Your First Job," helped boost my confidence in that I can achieve anything I set my mind to. The examples you provided helped me realize that all seasoned nurses once were new nurses and they too had the similar insecurities that I have experienced as a new nurse. This idea is calming to me and gives me great hope for the future. I love how you presented the information in such a humble way and I truly enjoyed reading about your experiences and recommendations. I love nursing! Sincerely, Erica Soto RN from Menasha, Wisconsin "I can't thank you enough for these wonderful tools! I used your audio on getting over mistakes and it really helped a lot. I particularly enjoyed the quote from Mark Twain. Also, your words: "First you must forgive yourself and see the lesson that you learned. Understand that you are a good person and that nothing happens that is not in the Divine plan. Second, replace this vision for a new awesome one!!" were so powerful to me and really helped. I actually wrote them down, so that I can refer to them in future. :) Thank you again for these wonderful gifts! I am so inspired by your work and

vision. I think it is so great that you have all these resources for nursing students, new nurses, and veteran nurses. Your books seem like wonderful resources for nursing students and nurses alike. Wishing you all the best." Oh my! I am in my 40s and have been an RN for 25 years. I have a ton of experience but I have felt so discouraged and tired the past couple of years with all the changes and the heavier work loads. So I came across this book after watching a few YouTube videos from Caroline. I feel a renewed hope inside of me. I definitely think this book is for all nurses who need encouragement. Not just the newbies. I have already recommended watching Caroline's YouTube videos to a student nurse and a coworker. Now I cannot wait until Monday and tell my manager and mid manager about this book. Thank you so much for sharing your thoughts and for your humble wisdom.

I loved it because it is easy to read, conversational, and filled with great tips and bits of

encouragement. As new grad RNs, we need all the help we can get, and Caroline's book is so uplifting and gives you the tools to be a really great nurse. I especially loved her tips about picking scrubs w/ identical pockets so you always keep organized throughout each day!

An amazing book of inspiration based on Caroline's experiences. I learned so much from this book, and felt very prepared for my first day of work. If you want guidance for everything from getting a job, to being prepared for it, make sure to read this book! I also love the fact that she makes herself available to interact with readers and viewers of her youtube videos. She is a true inspiration and a great example of a real nurse.

I am an RN, I just started working on the floor. During general orientation, I recognized many of the things that Caroline talks about in her book. I have found her information and insight to be invaluable. This book not only gives you a great stepping stones but provides some MUCH NEEDED POSITIVE ENERGY AND THOUGHTS. There is a lot insight in this book that not only speaks of the caring nature of Caroline, but how you too can develop a caring attitude. Nursing is a privilege and she really brings this message home. Thank you

This is Christina and I am a new graduate RN about to start an internship at a hospital soon. In preparation for this internship, I am reading this book written by Caroline and honestly, it is just so beyond helpful, inspiring, educational, and motivational. Caroline is awesome and just reading her book and watching her videos on youtube...make me hopeful to become a successful nurse like she is one day. Reading this book makes me wish she was my instructor through nursing school because I am already learning so, so much from her. GREAT BOOK for NEW NURSES! Worth every penny. Highly recommended.

Bought his few months ago. I was hired as a nurse in April 2016. At first I thought really? But then she does good tios on few things here and there; like the pockets things. It seemed like nothing at all at first but i did it ever since i read that chapter and it does help a lot. As you go through the book though, you have the feeling that it is not enough. Don't get me wrong, she brings up subjects that will make sense to many but when you start as a new nurse on the floor you need a bit more profound advices, at least I did. 4 stars because she took the time to write it and it helps some so it is not a waste of time or money reading it. You can email her too which I thought was really nice too...Overall ok.

Great book, the content was really relatable. My biggest complaint is in the last 4 chapters the left side of the page the first 5 or so letters of the words didn't print. Because of that it was very hard to read. For the most part I could guess what it said but sometimes I have no idea what she was trying to say due to the printing issues.

Absolutely loved it ! I'm not exactly a brand new nurse, but I could definitely relate to 98% of the stories in the book. Plus it has some great suggestions on how to handle some difficult situations that you may be facing on the floor. Thanks for writing this book and I recommend it to all new nurses. Wish I would have read it sooner.
