interesting book. Rather than an book about organizing though, this is a series of interviews with organizers. There are interesting stories told about the challenges they have faced. There are many links to those interviewed web sites as well as listings of their book and articles. If you are interested in organization as a profession or looking for insight into organization and the people who make their living at it this would be a good book. If you are looking for organization how to you probably want to look at other books.

To be able to follow through on these secrets, one has be organized to be able to glean those nuggets that the experts reveal. The dialogue is broken up with Q & A...but I guess I was anticipating a bit more handy suggestions as in the usual organizational books. These discuss more of the psychological reasons behind clutter/hoarding/etc. and their ways of handing it...which is interesting up to a point. Not exactly a page turner.

There wasn't much new for me in this book but it was free so I'm ok with it. Mostly what you already new, get rid of the junk, downsize, donate, trash it, and so forth. Label everything, etc. Mostly just stories about professional organizers and their experiences. I actually learned that there are organizations and credentialing for professional organizers and that there are formal names for chronic collectors and hoarders. Who knew?

All the different techniques have given me a better understanding of myself which is helping me overcome the hurdles I face. I think it is one of the best books I have ever read on organizing because it gives so many different perspectives. I was amazed at all the different approaches each

organizer used in working with individuals to help them get organized. I highly recommend this to anyone who wants to get organized and has any kind of obstacles holding them back.

As a Certified Professional Organizer it is great to have interviews with valuable information and insights from the biggest names in our industry, especially when they are coming from one source. I have, and will continue to, refer back to it for reference.

I read this in short order and loved it. It was like an Ask the Organizer Panel with the best of the best in our industry. I am recommending it to all the organizers in my informal organizer group, especially the newer organizers. Loads of great strategies and tips for organizing anyone.

Donna is the best selling author in our genre of professional organizing. As a long time student and amazing writer, She has pulled out all of the stops to deliver good content from interviews with other organizing experts. If you are seeking strategies to get your life in better order, this is a 'must read'.

I'm mostly blind, and so I HAVE to be at least reasonably organized or I'd go nuts on a daily basis. Even though I'm organized, I got some great tips from this book that I would never have thought of before. Get it!
