Django Kroner is the mastermind behind The Canopy Crew, a custom tree house building and tree care company based in Cincinnati, OH. Django enjoys life in the canopy. With a background in rock climbing, rigging, and construction, the dream of living in a tree house became reality in the Red River Gorge. Tree climbing became his ultimate urban career, and with a passion for building, The Canopy Crew was born.

Being a 71 year old woman, I will not be doing the building. But I did want a "nuts and bolts" look at

what actually goes into as I have my structure built by a professional. I enjoyed it very much.

This book was given as a gift and the recipient seems to enjoy the detailed information. It is very thorough, from selecting the right location and tree to the finished treehouse, suitable for habitation. Several styles and examples for construction are given. I flipped through and the pictures are AMAZING!

This is an excellent book on tree house building. Covers all the things you need to know BEFORE beginning a project. Especially useful are the sections discussing trees, tools and sources for materials. This is the best book on tree house building I have read.

Great beginning for understanding tree work and tree house building. Well written and informative.

Exactly as advertised..."the book I (author) wished existed when I (author) started building."
Excellent advice, the kind you'd offer yourself on your second, or third, build.

Very good practical advise
The best guide

Really enjoying this book. Exactly what I wanted
