Customer Reviews

New Text Book

A high school textbook that is easy to follow and understand. The assignments, practices, and tests within are easy to assign and administer, especially for the home schooling parent. I wanted a guideline to follow in order to know what to teach and share with our child so that he would get a well rounded understanding of world geography. I wasn't certain which way to go about doing so, until I was at a friend's house and noticed her child's textbook - this same textbook - lying on the table. Out of curiosity, I began looking through it and knew that this was what I needed. I questioned my friend's daughter, who is the same age and level of learning as our son, about the book. She went on to explain to me that it was really interesting and easy to understand. She continued by saying that unlike some textbooks that it was really easy to follow and work through as well, and that she really liked the textbook for a change. After returning home, I immediately searched the internet in order to get a copy. It arrived in great shape and ahead of the time stated for it to arrive. I then began going about preparing lessons from it, and it is great not just as a textbook, but it is also informative in a way that it can be used as a reference book as well. Easy to read, lots of pictures, very informative and detailed, easy to understand that I give the assignment and our son works on his own without much further explanation. Even though it is said to be a high school textbook, I believe that the advanced placement 8th or 9th grader could easily benefit from the lessons among

the pages of the book as well. It was definitely worth the money and the wait for it to arrive. It is one of the best purchases I have made for our home school!
