# Laboratory Experiments In Microbiology (10th Edition)

## Synopsis

Containing 57 thoroughly class-tested and easily customizable exercises, *Laboratory Experiments in Microbiology: Tenth Edition* provides engaging labs with instruction on performing basic microbiology techniques and applications for undergraduate students in diverse areas, including the biological sciences, the allied health sciences, agriculture, environmental science, nutrition, pharmacy, and various pre-professional programs. The Tenth Edition features an updated art program and a full-color design, integrating valuable micrographs throughout each exercise. Additionally, many of the illustrations have been re-rendered in a modern, realistic, three-dimensional style to better visually engage students. Laboratory Reports for each exercise have been enhanced with new Clinical Applications questions, as well as question relating to Hypotheses or Expected Results. Experiments have been refined throughout the manual and the Tenth Edition includes an extensively revised exercise on transformation in bacteria using pGLO to introduce students to this important technique.

Ted R. Johnson is a professor of biology at St. Olaf College, a liberal arts college in Northfield, Minnesota, where he teaches courses in microbiology and immunology. He has taught at St. Olaf for 34 years and previously taught at Mankato State University. He received his master's degree and his Ph.D in microbiology from the University of Illinois in Chicago, Illinois. While at St. Olaf College, he has developed and directed several abroad semester and interim programs.

His research focuses on the immune response to virally induced cancer in various animal models.

Christine L. Case is a registered microbiologist and a professor of microbiology at Skyline College in San Bruno, California, where she has taught for the past 41 years. She received her Ed. D. in curriculum and instruction from Nova Southeastern University and her M.A. in microbiology from San Francisco State University. She was Director for the Society for Industrial Microbiology (SIM). She received the ASM and California Hayward outstanding educator awards and SACNAS Mentor award. In addition to teaching, Chris contributes regularly to professional literature, develops innovative educational methodologies, and maintains a personal and professional commitment to conservation and the importance of science in society. Chris is also an avid photographer, and many of her photographs appear in this lab manual.

I bought this book for around \$12 and the textbook for about \$10. I didn't want to pay \$350 for the newest edition. I checked my classmates book and this book is pretty much exactly the same as the newer edition. It was risky buying the old edition but the payoff in saving all that money is worth the risk.

Pretty much the same as the newest edition for WAYYYY less. Very happy I bought this instead of the latest 200 edition. Was in excellent condition

great price!

The description is a bit misleading. Not worth the money to buy or rent the e-Book. You will not be able to access the exercise content in order to complete you assignments. I am very disappointed.

I was very satisfied.

Fast delivery great price

Easy to use. Step by step for every lab makes learning microbiology easy.

Worst book I have ever rented. The pages at the last of each exercise was rippe off so there was no use if this book at all . I ha to borrow the book from my other classmates . I do not recommend anyone renting or buying this book .
