Finite Mathematics, Hybrid (with Enhanced WebAssign With EBook LOE Printed Access Card For One-Term Math And Science)

Synopsis

Reflecting Cengage Learning's commitment to offering flexible teaching solutions and value for students and instructors, this new hybrid edition features the instructional presentation found in the printed text while delivering end-of-section exercises online in Enhanced WebAssign. The result--a briefer printed text that engages students online! Full of relevant, diverse, and current real-world applications, Stefan Waner and Steven Costenoble's FINITE MATHEMATICS, Sixth Edition helps you relate to mathematics. A large number of the applications are based on real, referenced data from business, economics, the life sciences, and the social sciences. Thorough, clearly delineated spreadsheet and TI Graphing Calculator instruction appears throughout the book. Acclaimed for its readability and supported by the authors' popular website, this book will help you grasp and understand finite mathematics--whatever your learning style may be.

Book Information

Paperback: 520 pages

Publisher: Brooks Cole; 6 edition (January 1, 2013)

Language: English

ISBN-10: 1285056310

ISBN-13: 978-1285056319

Product Dimensions: 7.9 x 0.8 x 9.9 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 1.5 out of 5 stars   2 customer reviews

Customer Reviews

"I have recommended it to colleagues. It is head-and-shoulders above our current book.""This book is superior to our current text.""Overall it is an excellent text."

Stefan Waner and Steven R. Costenoble both received their Ph.D. from the University of Chicago, having studied several years apart with the same advisor, J. Peter May. Their paths merged when Steven joined Stefan at Hofstra University in 1987; since then they have coauthored 18 research papers as well as a research-level monograph in algebraic topology. By the early 1990s they had

become dissatisfied with many of the Finite Mathematics and Applied Calculus textbooks. They wanted textbooks that were more readable and relevant to students' interests, containing examples and exercises that were interesting, and reflected the interactive approaches and techniques they found worked well with their own students. It therefore seemed natural to extend their research collaboration to a joint textbook writing project that expressed these ideals. To this day, they continue to work together on their textbook projects, their research in algebraic topology, and their teaching.Stefan Waner and Steven R.
