Cartel: A Jason King Thriller (The Jason King Files Book 1)

Synopsis

EXPERIENCE THE MADNESS. ENTER THE FILES. June, 2007. Black Force is a new division of the U.S. military that officially does not exist has its first operative. Jason King, a young prodigy who accelerated up through the ranks at an unprecedented rate, is tasked with proving his worth as a solo warrior. In Mexico, Joaquín Ramos has made a name for himself out of the blood of his enemies. The twenty-eight-year-old cartel leader hacked a path through anyone who dared to interfere with his newfound monopoly on the billion-dollar online drug trade, capitalising on the archaic nature of the existing empire in Tijuana. He's new school. So is King. With doubts swirling amongst those who know of Black Force's existence, King heads into the city's decrepit underworld alone, intent on tearing the cartel apart from the inside. Still largely inexperienced, it doesn't take long for his plans to fall to pieces. Outnumbered. Outgunned. Just the way he likes it. CARTEL is the explosive first entry in the prequel series, "The Jason King Files." Read "The Jason King Series" for more relentless thrills, exclusively on .

Good read.

Same old stuff, not impressed

For every reader who loves the Jason King series, *Cartel* is the introduction to the series that we didn't know we were waiting for, but now can't imagine how we survived without it! Speaking of surviving, it is a wonder how Jason King survives his first Black Force job, especially with his relative inexperience working against him. Somehow he continually draws on reserves and unique skills deep within himself to prove that "they" were right in choosing him to be a solo operative. As always, Matt Rogers provides vivid, detailed view of places and situations where you really do not want to go, but sure are happy that someone like Jason King is willing to go there and get the job done. Do not plan on any other activities (such as sleep) once you start reading this book - they won't get done until you finish, and catch your breath. Also, don't wait too long before you get this book; Matt Rogers is a prolific writer (he is probably writing or dictating in that skydiving photo) and he barely gives you time to recuperate before the next exceptional book comes out. Hang on - it's a wild ride!

A fast-paced thriller that keeps you on your toes as a young Jason is recruited for a new Black Ops force in which you are on your own...no unit to back you up or rely on, but also no one questioning what you decide, it is all up to you. This is a situation Jason is born for, with lightning quick reflexes and trained by many in different styles of fighting . Great scenes, descriptive situations and knowing what Jason is up to combine to keep you turning pages as the action moves quickly, You are in the story, running in the rain and humidity in the jungle forest, hearing twigs break as something moves to your right, jumping with the lightning flashes....Exciting story, 5 stars to Matt Rogers, again....

I could point out several examples but will stick with three.1). Contrary to the author writing twice early in the book that the San Diego airport was only one mile to Tijuana, it is actually about 17 miles.2) in the jungle of Guatemala, any open sore would rapidly become infected. Jason King had an open bullet wound and open abrasions to his face. Yet, without any (self induced) medical attention paid to these, he remained healthy.3). When King entered the jungle, he took 3 AK 47's off dead enemies. He knew lugging around 3 would be counterproductive. Yet, he did not have the sense to take the magazines out of the two AK's he left behind??? This made me shake my head in the ignorance of the author. No one in Delta would have done something so stupid.

Cartel is the first book in a new Jason King series. Matt Rogers takes us back to the beginnings of Black Force where twenty-two-year-old Jason King is recruited as a solo Black Ops agent. His first assignment throws him into the violent world of the Mexican drug cartels. Cartel is a fast-paced thriller that will keep you turning pages far into the night. The action is non-stop and the road to Black Force is fraught obstacles and potholes that give Jason King all that he can handle and may cause him to second guess his abilities as a solo agent. This is an excellent action packed read from cover to cover that will leave you wanting more. Highly recommended.

I absolutely LOVE Jason King. I was totally and pleasantly surprised when Matt Rogers released this latest installment. The man spits books out at warp speed (in the reading world) and has yet to disappoint me. Young Jason King on his first assignment is full of crackling energy waiting to explode and man does he com-bust! You don't mess with this young stud in action. I can't wait for the next installment starring Jason King. He's right up there with Jack Reacher and my all time favorite warrior, Zeb Carter. I was given this book because I signed up for more Jason King. Needless to say, I am not bias because any Jason King is worth the bucks!

At 22, Jason King is already a Navy SEAL and Delta Force! His problem is he likes to work alone; unheard of for the Teams. He just doesn't mix well and the other team members don't know what to make of him. He is too young and too skilled! Lars Crawford is trying to create a Black Ops unit using lone warriors. If King can accomplish an almost impossible mission, the Unit may be funded. "Cartel" by Author Matt Rogers, is brilliantly written to suck you in from beginning to end. Fast moving, imaginative, clever, and engrossing; this is a great read you won't soon forget!
