The Field Guide I For Actively Aerated Compost Tea

Synopsis

This is a reference book for truly dedicated growers questing for scientific knowledge and answers to questions about organic growing, the interface between synthetic and organic growing materials, and parameters to follow when using compost tea in either system. Field Guide I is 171 pages of email answers from Dr. Elaine Ingham (2001-2003) about current research on Actively Aerated Compost Tea (AACT) in Field Applications. The Guide is organized into chapters for easy reference about compost tea: mechanisms of impact, effects on diseases, ingredients, brewing techniques, brewers, and applications. This is the only reference guide (part of a series) on the market written by PhDs about how to add beneficial biology into plant growing systems. Dr. Elaine Ingham is the expert in this field throughout the world with microbiological laboratories in eight different countries. She has been the world-leader in the Compost Tea Industry for over 25 years. Since there are no textbooks written on this subject, this guide is the only reference the industry has available.

Book Information

Paperback: 171 pages

Publisher: Gardening With Nature (2005)

Language: English

ISBN-10: 0979756111

ISBN-13: 978-0979756115

Package Dimensions: 10.8 x 8.4 x 0.6 inches

Shipping Weight: 2 pounds

Average Customer Review: 3.5 out of 5 stars 5 customer reviews

Best Sellers Rank: #745,415 in Books (See Top 100 in Books) #84 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Shrubs #127 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > By Technique > Urban #162 in Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Trees

This is a reference book for truly dedicated growers questing for scientific knowledge and answers to questions about organic growing, the interface between synthetic and organic growing materials, and parameters to follow when using compost tea in either system. Field Guide I is 171 pages of email answers from Dr. Elaine Ingham (2001-2003) about current research on Actively Aerated Compost Tea (AACT) in Field Applications. The Guide is organized into chapters for easy reference about compost tea: mechanisms of impact, effects on diseases, ingredients, brewing techniques,

brewers, and applications. This is the only reference guide (part of a series) on the market written by PhDs about how to add beneficial biology into plant growing systems. Dr. Elaine Ingham is the expert in this field throughout the world with microbiological laboratories in eight different countries. She has been the world-leader in the Compost Tea Industry for over 25 years. Since there are no textbooks written on this subject, this guide is the only reference the industry has available.

This is not so much an how-to manual but rather a collection of transcripts of email conversations where Dr. Ingham answers questions from students. It is designed for large scale tea making (for commercial vineyards/farms/orchards) and not so much for the casual homeowner. Unfortunately, it is not well organized, and many of the questions and answers are repetitive. If you already know how to make compost tea this will give you definitions of all the micro-organisms and optional ingredients and some ideas on how to tweak your tea to be either fungal or bacterial dominated. It also has a section in the back of the book with formulas for figuring out application rates for various uses. This is not a book I would recommend to a beginning tea maker. This would be better for someone who is trying to MASTER compost tea and make huge quantities of it using machines for large production farms, orchards and vineyards.

This book is written as a collection of email responses to various questions asked about the making of compost & compost tea. While extremely informative if you can follow the format, it can be difficult to follow due to email conversation being edited for the book.

very interesting, it gives a total other view on this matter, you can learn a lot out of this book

Anyone who has been fortunate enough to hear one of Dr. Ingham's presentations will greatly appreciate the depth of this book. She continues where she leaves off in her talks. Personally I can't get enough of her info. Her work is brilliant and life-changing for serious gardeners and food producers. However, if you haven't been exposed to her work yet, this may be a little beyond you...what is mesmerizing to me may seem dry to you. Try to get to see her in person, she is dynamic and grabs your attention. You will walk away with a new understanding of why microbiology is so important for your garden or farm. Then this starts to make more sense. You can find more info about her work at [soil foodweb](#).

This book is really disappointing. Actually it is not a book. It is just a collection of old emails. Trying

to glean any usable information out of it is difficult. I must say that it would take a lot of nerve to ask this kind of money for a bunch of emails. There is a much better book available. check it out. Compost Tea Making: For Organic Healthier Vegetables, Flowers, Orchards, Vineyards, Lawns
