Customer Reviews

This attractive chart highlights in color all the essential aspects a 1st year dental (and medical) student is expected to know and remember. Besides listing the various functions of the teeth, it includes anatomical pictures of a tooth (cross-section, enlarged), the cranium in childhood, and various age-related configurations of dental arrangement in the oral cavity. It has also a figure about tooth decay, and recommendations for proper tooth care. This 20" (Wide) by 26" (High) wall chart is highly recommended for 1st year dental (and medical) students, and also for display in a dental

office (and their respective waiting rooms) for explaining to patients the conditions of their teeth. NOTE: Should you have any comment(s) and/or suggestion(s) about this review, I can be reached via email at . I look forward to hearing from you.

Poorly packed, obviously they didn't have the right sized box. The customer being the person that's responsible for disposal of their over-sized boxes is not a good idea. The worst part, is it permanently creased my poster - waste of money at this point. Shouldn't have this type of concern on - you can tell when it's not them. Quality wasn't there. The content of the poster was good (that's why I bought it) but not worth displaying in a professional environment.

Wanted a chart to do some review and this worked for me.

I posted this on the bathroom door so my kids can look at it while they brush their teeth. It's a very high quality poster

Great visuals to show parents.

Arrived quickly. Thanks!

This has a lot of info, should help on my tests.

Great
