## Synopsis

Elder Law in Context integrates cases, statutory materials, forms, policy and ethics to provide a well-rounded and comprehensive study of Elder Law. The book demonstrates that the law of any given practice area in reality isn't made up of discrete doctrinal areas but rather consists of interrelated and overlapping areas, and covers legal doctrine in contracts, agency, ethics, torts, constitutional law, administrative law, public law, criminal law and more, as they relate to Elder Law. This approach provides both an excellent and practical vehicle for learning Elder Law, but, by reviewing core doctrine from earlier and more foundational law school courses, it helps to prepare upper level students for the bar exam. The book provides ample opportunities for students to apply lessons, through the various problems and exercises throughout.
