Jungle: A Photocular Book

Synopsis

Dense and humid and filled with secrets, the rain forest is home to more than half the world's plants and animals. Using unique Photicular technology, Jungle parts the mysterious veil of this sun-dappled land and reveals in fluid 3-D motion the living exuberance within. Watch a tarantula scuttle across the forest floor. A dancing whipsnake flick its tongue. A Bengal tiger on the prowl, and a brilliant green and red macaw soar above the canopy. It's magical! In a world saturated with video, Photicular technology weaves a very special spell, capturing intimate, moving moments of life on earth, and tapping deeply into the reader's imagination. With three books published—Safari, Ocean, and Polar—the bestselling series has over 1.3 million copies in print. Experience it for yourself.

Book Information

Series: Photicular

Hardcover: 24 pages

Publisher: Workman Publishing Company; 1st Edition edition (September 6, 2016)

Language: English

ISBN-10: 076118953X

ISBN-13: 978-0761189534

Product Dimensions: 8.3 x 1.9 x 8.2 inches

Customer Reviews

Dan Kainen is an artist, designer, and inventor living in New York City. He is the creator of the bestselling Photicular books Safari, Ocean, Polar, and Jungle. His website is DanKainen.com. While working with some of the pioneers of holography, Dan created a special spotlight that was used by Soho's Museum of Holography to light holograms. The related field of holography led to Dan's interest in lenticular art and, in turn, after nearly a decade of research and

experimentation, to the creation of his "Motion Viewer," his third patent in that field and the inspiration for Safari and the other Photicular books. Kathy Wollard is a science journalist and the author of the bestselling How Come? Every Kid's Science Questions Explained. Her work has appeared in Newsday, Scholastic, Popular Science, and Family Fun magazines.

My 15-month-old grandson loves this book. It keeps his attention and delights him everytime he reads it. This one, I think, is better than the Safari book because the animals in this Jungle book do more interesting things, like blinking eyes, chewing, scratching, whereas the Safari book basically shows animals walking and running.

This book is absolutely AMAZING! As you turn the pages the pictures "come to life" as if you are watching a short video! Normally when I purchase a gift on I just have them wrap it and send the gift directly to the person, but as a Christmas present I bought a few of these "Photicular" books and wanted to wrap them myself..I was simply amazed when I looked through it! Even my Husband had to come over and see for himself. Not only would I recommend these as a gift, I would suggest having them be delivered to you first so you can enjoy them before you give them away!

My son has the Ocean photicular book. His cousin saw it and loved it, so I bought him this one for his birthday! It's nice to buy kids something other than toys that they love and will learn from.

These books are awesome! Bought them for my 5 year old cousin who is obsessed with learning about animals. Each page is like a mini movie and you control the speed that the animals are moving, he loved it! There are simple facts and information about each animal on top of the moving pictures, which is really cool. These books are so cool, worth it!

The pictures that move when you flip the pages are awesome; our sone wanted more of these types of books. It encouraged him to want to read more about these animals.

I love the pictures. But way too much info to read thru, would have preferred key points. Most kids flip thru the picture and forget about reading since it's too much info.

I have Sarfari, Polar, and Ocean for my nephew when he visits so of course I had to get Jungle and

will get any more that come out. I do find the books are getting less and less spectacular since the pictures are not as dynamic as the first book, which is the main appeal, but they are still cool to have.

The books in this "series" are all fantastic. The pictures are amazing, and a huge plus is all the reading information about the subject in the pictures. Every school library should have a copy of these books. A GREAT gift for any child.
