Immortality Of The Gods: Legends, Mysteries, And The Alien Connection To Eternal Life

Synopsis

Each of us are alive for a very limited time. Or are we? What if we could live not just for a century, but for millennia? What if there were a way for us to never die? Is such a thing even remotely possible? It may not only be feasible; it may very well have been achieved in the distant past. Ancient aliens may well have uncovered the secrets behind slowing, and ultimately completely stopping, the aging process. History is filled with accounts of fantastic beings, powerful gods, and half-human/half-alien entities that had extraordinarily long life-spans. Many such stories are now largely dismissed as nothing more than the stuff of legend, folklore, and mythology. But what if the accounts are all too real? Highlights of Immortality of the Gods include the story of the legendary Anunnaki, how they achieved everlasting life, and why they shared their secrets with Noah, Methuselah, and other biblical figures; the saga of Gilgamesh, a long-lived part-human, part-extraterrestrial Sumerian ruler who was obsessed with immortality; and a study of the claims that one of the reasons for the 2003 invasion of Iraq was to uncover the millennia-old secrets of white powder gold, a manna-like substance that supposedly rejuvenates cells and tissue.

Another good one from Nick Redfern. The author includes info about our own govt's secret programs dealing with longevity & immortality. A fast read!

This is a page turner! Some of Nicks' best writings. It is captivating and educating at the same time.

It explores some areas that really makes sense.

Nick Redfern is an author that has tackled a variety of subjects, and in this book he does no different. In *Immortality Of The Gods*, Redfern seeks to ascertain whether or not there's any substance to the legends of immortality throughout time. In its nascent stage, the book begins with the argument that in ancient times there were beings that had extraordinary life spans due to incredible elixirs such as the White Powder Gold, Manna, Indian Amrita, and other potions. Drawing from wide-ranging sources that range from the Bible, the Epic of Gilgamesh, Sumerian sources and more, Redfern collates data based on stories that claim beings with extensive lifespans have lived through various periods in our history, although more notably in our ancient past. Some of these individuals include Count St. Germain, Adam, Methuselah, Seth, and a few others. Furthermore, not only does Redfern examine ancient sources, but the author also examines more modern cases that dovetail more into the UFO field, such as the case of Valiant Thor. While the book does make an argument compelling enough to further research, the book isn't without its flaws. First, some sources are much stronger than others. This makes for a book that could have possibly been really good into a book that's still worth a read, but okay at best. Granted, tackling a subject of this magnitude isn't exactly a walk in the park, however, drawing information from books/articles just because it exists doesn't mean it's going to bring credibility to the book, especially in a subject that's already incredibly convoluted. Secondly, the author uses many sources, which is fantastic. However, when quoting from these sources the author never once sources the pages of material where applicable. It wouldn't have taken much effort to do that, and an independent researcher will have to leaf through thousands of pages to find out what parts of which books information used by the author is at. Any solid researcher will have a nightmare trying to further research topics covered within this particular book. Overall, if you're really interested in the subject the book does have some intriguing information to take note of. That said, some of the information provided could certainly be read - or interpreted - in different manners, which leaves some areas of the book quite lacking.

Another well researched and well-written book by author Nick Redfern. I am fascinated by this topic, but never really looked into it much beyond the Spanish explorer, Juan Ponce de LeÃ n's, attempts at finding the Fountain of Youth. In this book, we learn about legends, mysteries, and even hush-hush government studies on the topic of Immortality. From White Powdered Gold to Manna, Ambrosia, and more, Nick Redfern takes us through history, sharing different legends of not only the search for immortality but of apparent immortals themselves. You will also hear about a Russian

man named Anatoli Brouchkov that has been injecting himself with a strain of bacteria since 2013 in hopes of one day finding the key that unlocks the mystery of immortality. While I'm pretty certain that the answer won't be found in a diet consisting of nothing but Velveeta's self-proclaimed "liquid gold" (more commonly known as cheese) and bottles of Goldschlager, this book certainly makes one ponder the possibility of immortality as well as the ramifications of it.

Another fascinating book from Nick Redfern. In his latest, he includes many stories of half human and half alien entities. I don't know if they are true or not but I really enjoy reading about them and he does a great job giving a lot of information that he has researched. I thoroughly enjoyed the third book in his trilogy.
