## Customer Reviews

My land surveying career began several decades ago while attending Albuquerque Technical Vocational Institute in New Mexico and has traversed many states such as Alaska, Arizona, Utah and Wyoming. I am a Professional Land Surveyor in Arizona, Utah and Wyoming. I am an appointed United States Mineral Surveyor and a Bureau of Land Management (BLM) Certified Federal Surveyor. I have many years of computer programming experience related to surveying. This book is dedicated to the many individuals that have helped shape my career. Especially my wife Cindy. She has been my biggest supporter. She has been my instrument person, accountant, advisor and my best friend. Without her, I would not be the professional I am today. Cindy, thank you very much.

This book is more of a booklet and is geared more towards the beginning professional or toward a surveyor's helper. It is a mix of very basic instructions and esoteric survey language. I find no fault with the advice and techniques but it is not a stand-alone book that will teach the novice how to do layout; its more geared toward the beginning professional who needs a handy reminder/refresher on

layout. It probably works best as a part of the whole set which it is. I could see this entire series being rolled into a text book with each booklet becoming a chapter.

EXCELLENT

Good Basic Introduction

great book for my library

Good construction Book!

Basic staking in a simplified format.

The little bit of information you find in this book can be easily googled in a matter of a few minutes. Apparently, this book is part of a set and often refers to other books in the set for pertinent information. So, if you're looking for a book to actually teach you some practical knowledge, this book will disappoint you. It's really nothing more than a handful of cheat sheets someone put in a book form to sell, and can literally be read in about ten minutes.

Clear concise and covers a very broad spectrum of construction staking methods. A great help to anyone just getting into surveying.
