this book has a lot of information and advice for the newbie. he focuses more on flipping. he has years of experience and the book sets forth the information in an easy to understand manner.

Great read!

Informative, but long winded.

Very basic. This book gives a good overview for somebody who is brand new to real estate. If you have already read books on real estate and/or have done some investing, this book may not do much for you.

Good book, to much too soon. Need to take time to digest the steps but great book.

This book contains accurate content and if serves as a smart guide for newer investors. Great book lots of good info.

From the promotion, I expected to learn a lot from this book. But it is very basic. Some of the information would be good for beginners and some would be harmful. For example, he seems to think that he has done good deals??? In my opinion he pays too much and expects too little profit. The unexpected almost always shows up during construction and again during the sale. To work on a slim profit is suicide! It can be turned into a loss with just one or two surprises. And why bother taking the risk for anything less than a huge profit? It has been a while since I read this book, but I remember there were a lot of things I wanted to argue with him about. I will say that the book was well organized. The other thing that I did not like was the offer: buy the book on the first day and receive a \$3000 course absolutely free. It was not a course in the mail or even an E-book. It was an invitation to travel hundreds of miles to his rah rah upsell event. If I regret the time that I spent reading the book, why would I want to travel hundreds of miles? Why would I want to buy what he is selling and why would I find \$3000 in value travelling to his upsell vent?

I have read about 15 books and attended about 5 seminars (one cost \$1997!), and this book has given me better and more complete information. When I become a successful real estate investor, I will give credit to this book alone, not the other books, and not the seminars. I'm not there yet, because currently I'm starting my own business instead.
