## **Customer Reviews**

This is one of the most creative beauty books I have ever read. In general when I talk with friends about different beauty regimes and products it is always in the current moment and what is available right now. This book has a nice twist to it in that it starts with beauty procedures and products from as early as Cleopatra in 31 BC. It then moves slowly forward in time and explains beauty regimes and products for famous people such Mary of Galilee to Lucrezia Borgia and many more. The second section of the book explains various body parts and their requirements for keeping them healthy and an extensive list of ingredients including essential oils, fruits and vegetables and bases. This section is very informative and educates and prepares you for the last section. The last, and third section is the recipes. This of course is where everything "comes together". All the history and education will help you in deciding what your beauty regime will start out as and help you to plan on where you would like to go with all the options available to you. A book like this does not come along everyday and I found it to be creative, educational and entertaining. Highly recommended.

This is definitely a different book as the author chose to share a dream sequence as a way to introduce various health and beauty recipes while telling the stories of legendary beauties through the ages. Don't worry, though, the author also captured all the recipes in one section that you can immediately find. The beauty recipes include the use of essential oils and gems. When's the last time you used emerald? You'll find recipes for the face, body, skin, feet, as well as a few detoxing ones, too. Good explanation of the use of beauty products and what is needed in order to follow a natural beauty regimen.

I really, really like this book! It's a really creative and imaginative way to introduce and explain products that you make yourself, with fruits, essential oils, and more. From Mary Magdalene to Marilyn Monroe, so good!

This book "IS" full of secrets! Love, Love, Love It!

good book

Couldn't follow all the history, but there were some interesting tips and recipes at the end.

Not impressed.

Wow this book is full of great beauty recipes along with information about women through the ages. The information on fruits and vegetables and how they can be used in beauty I found most helpful. This is the perfect beauty read and I look forward to trying some more of the masks. The Jessica Rabbit cleanser is great :)
