Four Neotropical Rainforests

Synopsis

The rapid disappearance of tropical forests is widely recognized as a crucial problem for the world's environment, yet little is known about these complex ecosystems. In this book, experts on the four most thoroughly studied rainforests in Central and South America (Manaus, Brazil; Manu Park, Peru; Barro Colorado Island, Panama and La Selva, Costa Rica) compare the flora, fauna, and ecological characteristics of these forests. This assemblage of data, available for the first time, should be a valuable resource for researchers and students.

Book Information

Hardcover: 640 pages

Publisher: Yale University Press; First Edition edition (January 16, 1991)

Language: English

ISBN-10: 0300047223

ISBN-13: 978-0300047226

Product Dimensions: 9.6 x 6.6 x 1.9 inches

Customer Reviews

It's classic work in tropical biology.

Text written by a great botanist and very helpfull in expanding our knowledge about Tropical forest ecology, specially in the basin.

I'm very pleased with this product. It was affordable, and it cuts great. I was replacing an extremely dull chef's product that I couldn't seem to get sharp. This product has been a welcome change. great, my best friend need it , will buy next time. Received as described.
