Melissa Watson is a professional firefighter who has been hiking trails and photographing waterfalls in North Carolina, South Carolina, and Georgia for almost 20 years. Whether searching out new falls or revisiting old favorites, she has become known as a local expert in the field.

We live in Georgia, but plan to retire in Western North Carolina. We visit several times a year, and always "do" a waterfall hike, or a view hike. I think the directions are great, and I agree with her on the beauty ratings. I always take it with us so we can easily find the trailhead. Also includes great photos, and it's very well organized. Buy it, you won't be sorry!

Good book. If I have a criticism I would like to see a larger overall map or have it broken into sections, otherwise it was very useful and the information accurate.

This book is well written and I am eager to "test it out". I live in Alabama and I have spent the last 11 weekends exploring Tennessee. I plan to work my way to North Carolina soon.

This is a great addition to our guidebook library. We found some hikes that were not in our other books. The maps are well designed, pictures are helpful, and the narratives help guide you along the way. We can't wait to check off as many waterfalls as possible.

Very specific in showing the routes to get there and how to find the trails, also pictures to show most of the waterfalls. So far it's the best waterfall book I've seen.

Well organized (geographically) and great info on each hike, as well as location / directions.

Not only does it contain most waterfalls (no easy feat in itself) but it includes helpful tips as to hiking distance/difficulty, accessibility and such which if you are not familiar with the area are very valuable. I found the accessibility ratings very useful and accurate.

Good book. One of the most comprehensive listings of the waterfalls of the state of North Carolina. Detailed directions to trailheads and good descriptions of the waterfalls. Photos in the book are in color though not all waterfalls listed are photographed. The maps could be a bit more detailed.
