Shells Of The World Coloring Book (Dover Nature Coloring Book)

Synopsis

Color dozens of shells from around the world – from Australia's poisonous textile cone to Florida's flamingo tongue. Mollusks build colorful shells around themselves for camouflage and defense. Shells also attract humans for their beauty and value. This ready-to-color collection offers nearly a hundred of these hard-shelled wonders from around the world. Shown in native habitats that include oceans, reefs and beaches, you'll discover spider conches and jackknife clams from the Indo-Pacific, Atlantic Bay scallops from New England, fig shells and white-edged augers from Australia, tropical giant clams from Japan, and many other mollusks. Captions include common and scientific names.

Book Information

Series: Dover Nature Coloring Book

Paperback: 48 pages

Publisher: Dover Publications (March 1, 1983)

Best Sellers Rank: #444,301 in Books (See Top 100 in Books) #145 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Oceans & Seas](#) #181 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Water](#) #674 in [Books > Crafts, Hobbies & Home > Crafts & Hobbies > Papercrafts, Stamping & Stenciling > Papercrafts](#)

Age Range: 7 - 11 years

Grade Level: 2 - 5

Customer Reviews

Like some of the other educational coloring books, this book provides pictures of how the shells are supposed to look. The sample pictures are somewhat small, but better than a few of the other such books. Although, I've seen some of the shells with a slightly peachier (less brown) version, they otherwise appear to be essentially accurate sample pictures. It doesn't include some of the beautiful spiked shells that I have had in my collection (obtained long ago before awareness that shells were

a creature's home). Some of the other coloring books in the educational line are very nice, but this one is rather dull, unless you decide to be whimsical with it. All beige or brown-tones and white. The "Coral Reef" book by Dover (same publisher) is more colorful (in the sea and in sample pictures). Dover's "Snakes of the World" is also education and has some color variety.

arrived fast in perfect condition. Very pretty pages, but you have pics. on both sides which sucks, has staples, so its better than glue or whatever. Just pull out your staple remover 123 its over

given as a gift for long travels

I like this coloring book, scenes are pretty. There is considerably large background area in most of the pictures, you might not love this if that bothers you. I have been experimenting with water with my watercolor pencils and markers on the backgrounds, with mixed results. But it's getting me to try new things, so that's always a good thing. Also cannot beat the price. Enjoy.

Very enjoyable. It's nice that both the common and scientific names are given. I've always found the dover books to be well worth the price.

very nice pictures to color. beautiful seashells and under water fish, coral and sea creatures. I would recommend this book.

I won't be coloring in this book until the days get longer and I have more natural light, but it's a pretty good coloring book and cheerful.

Great information along with beautiful pictures to color.
