Customer Reviews

This audio CD series is generally well-produced and organized. The content is essentially a mini-course introduction to the topic of public speaking. I bought it with the idea of listening to it during my morning commute, and it served that purpose nicely. In terms of criticism, three things come to mind: 1. The material feels a little bit dated. I can't quite pinpoint it - the stories, the music, the narrator - the presentation just feels like it is from the early 1980's. 2. The material is not really that original. You would get nearly identical information from any general introduction to public speaking. I didn't see much unique value to this product. 3. The program is a little disjointed. It comes across as a well-organized list of do's and don'ts. I enjoyed the product, but I would not recommend it. If I had the money to spend over again, I would look for a product that offered more unique value with less focus on tired and well-known information.

I agree with the previous reviewer that there is little new information in this audiobook. If you have already read or worked through other books/courses/audiobooks on public speaking, then you will be familiar with much of the content. But if this is your first study of public speaking then, for your dollar, there are few better ways to begin. This is a solid, compact course that will not set you back a few hundred bucks. I bought this audiobook as someone who has to speak and present in front of large groups on a regular basis, and who also has to teach public speaking to highschoolers for debate, speech contest and presentation. It has been extremely useful for me.

As with other Carnegie products, this is first rate.

it does exactly what I wanted it to do. It is exactly what they said it would be. Thank you!

Prefer "How to Develop Self-Confidence And Influence People By Public Speaking" book much much better. Sound more Dale Carnegie Way. Hope there can be an Audiobook version of it just like "How To Win Friends and Influence People". This "Stand and Deliver" Audiobook is not outstanding. It does not preach enough Dale Carnegie way in public speaking. Far from it. Too common sensical and not insightful enough. The narrator's voice is stiff and unnatural. There are nothing wow or exciting new from this Audiobook. Many theories and practices were well told in other public speaking literature or audiobooks. Try "You Are the Message", "10 Days ..Confidence

in Public Speaking" and "Articulate Executive". Far better and stimulating. A bit disappointed, and this Audiobook claims itself to be the best "Science of Public Speaking", the most comprehensive audio program. An overstatement, especially to veteran public speaking masters and audiobooks listeners.
