Ernsting's Aviation Medicine, 4E

Synopsis

Ernsting's Aviation Medicine applies current understanding in medicine, physiology and the behavioural sciences to the stresses faced by both civil and military aircrew on a daily basis. The fourth edition of this established textbook has been revised and updated by a multi-disciplinary team of experienced contributors, and includes new chapters on aeromedical evacuation, commercial passenger fitness to fly, transport aircraft and passenger safety cosmic radiation, and naval air operations. It remains the recommended textbook for those studying for the Diploma in Aviation Medicine of the Faculty of Occupational Medicine of the Royal College of Physicians, recognized worldwide as a standard in the field, and for similar overseas qualifications. This is an essential text for all civil or military aviation medicine practitioners, both when preparing for professional examinations and in daily practice, and for those in the many disciplines of the behavioural and life sciences that include some study of aviation, its physiology and related issues. It is also recommended reading for those with a wider interest in the medical problems of professional or recreational flying, air transport and the aviation industry.

Book Information

Hardcover: 800 pages

Publisher: CRC Press; 4 edition (March 31, 2006)

Language: English

ISBN-10: 0340813199

ISBN-13: 978-0340813195

Product Dimensions: 10.9 x 1.6 x 8.3 inches

Shipping Weight: 5.8 pounds

Captain's David P. Gradwell, Royal Air Force Consultant Adviser in Aviation Medicine, RAF Centre of Aviation Medicine, RAF Henlow, Bedfordshire, UK

Three Days to send across half the World! An excellent book where you'll find everything that's even slightly connected to Aviation medicine. Real happy with this book and the service.

Excellent!

It is very difficult to review a textbook!!!!!!Ask me again at the end of 2014, when, hopefully, I will have passed the BSc [Hons] Aerospace Medicine, a degree run by the University of Pretoria, South Africa. I am now halfway through my first year of the degree, and the only negative comment I have about this book is that it is written by men, and contains very little reference to females in the world of aviation!
