Censored Science: The Suppressed Evidence

Synopsis

Censored Science is a stunning designed, full-color book showcasing the fifty best evidences for a biblical creation worldview. Each two-page spread lays out the evidence for creation and then provides a rebuttal to the most common evolutionist objections to the evidence. Updated and expanded in 2014, the volume contains both the most recent cutting-edge evidence for creation and time-tested evidence which have never been answered by those rejecting Biblical truth. The book is divided into three major sections - Censored Biological Evidence, Censored Geological Evidence, and Censored Cosmological Evidence. Each section starts with a description of how an assumption of naturalism prevents our educational system from exposing students to any evidence which contradicts the presuppositions of evolution. Every page is a visual masterpiece, mating original photography or graphic designs with compelling text. Rather than a simple presentation of facts, Censored Science draws the reader into each subject using stories, analogies, and illustrations of the relevance for each of the evidences for creation. This coffee table quality hardback is the kind of book anyone would be proud to give to others. It has been technically reviewed and endorsed by some of the top scientists involved in creation research - including Dr. Steve Austin, Dr. John Baumgardner, and Dr. John Sanford.

Book Information

Hardcover: 128 pages

Publisher: Search for the Truth Ministry; First Edition edition (December 1, 2009)

Language: English

ISBN-10: 0971591156

ISBN-13: 978-0971591158

Customer Reviews

Creation Research Quarterly Book Review by Clifford Lillo: This hardcover, beautifully illustrated book covers three important areas in the evolution-creation controversy: biology, geology, and cosmology. A significant feature of the book's layout is the concept of two facing pages for each

topic, complete with text, full-color picture, and a short paragraph called "skeptics corner". This layout by Bruce Malone has resulted in a book that is the perfect tool for urging high school students that the path of evolution is not true science and that the scientific realities of the Bible should be suppressed no longer. The author consulted literature written by scientific creationists and evolutionists and shows that the time has come for the principles of science to be applied to evolutionary beliefs. This includes the fallacies of claims that the earth is billions of years old and that all life originated spontaneously from dirt and chemicals. The reader is introduced to the writings of Micheal Behe, Martin Lubenow, Ian Taylor, Michael Denton, Andrew Snelling, Kurt Wise, John Morris, Michael Oard, and numerous others who have researched evolutionary literature, laid bare the false claims, and presented facts to show that evolution has never been a fact. Under the heading "Folder Mountains", Malone writes, "Throughout the mountain ranges of the world, there are enormous layers of sediment which have been bent and folded without breaking, This could only happen if these mountains were uplifted while the sediment was of a soft, pliable, mud-like consistency." (p. 64). He then tells the evolutionary story about the hundreds of millions of years needed to accumulate the sediment and how it would break under the enormous upward pressures. In contrast, the Biblical record describes a worldwide flood that resulted in a rapid accumulation of sediment that can account for the folded rock layers now visible. Under the heading, "The Mystery of the Woolly Mammoths", Malone writes, "Skeptics have not been able to come up with a model of Earth history that adequately explains either the cause of the ice age or the demise of the mammoths" (p. 78). He then supplies the reasoning given by Michael Oard for the existence of semitropical vegetation found undecayed in the mammoth stomachs, and the scientific rationale for the existence of the mammoths in the frozen north in the first place. Using this logical approach, the author describes fifty of the most convincing evidence that we have a Creator God and a Bible that has recorded the facts. Not content just to write this book and have it published, Bruce Malone, full-time director for Search for the Truth Ministries, has traveled extensively in the United States and Europe, distributing copies free to students, teacher, missionaries, and prisoners. David R. Brooks, 12/5/09, Reviewer for Mt. St. Helens Creation museum: I have just finished Censored Science The Suppressed Evidence by Bruce Malone, and it is a keeper. When I saw that it was evidently a self published book I had my reservations. I had yet to read a self published book that was worth anything, but Malone changed my mind. The illustrations are brilliant and well done. They help the reader think about the text but it is the information which Bruce shares that is fabulous. I marked a few places that gave me new information. One was on page 20 about the Urey/Miller experiment. It was first promoted in 1953 as an explanation for how to create life from a

proper construction of organic substances. I did not realize that this widely publicized experiment first occurred just after I was born [nor the problems not exposed to most students]. How people imagine that they can make the spiritual out of the material is beyond my comprehension. I loved the plant section on page 40. I have seldom seen the problems of plant evolution laid out so clearly. I am also glad for the careful referencing. The Skepticâ€™s Corner is a good part of the presentation. Although Malone expresses more skepticism of evolution than creation, I can understand that. He does not actually give a fair presentation of the â€œother side.â€ But why should he? We can read the â€œother sideâ€ in National Geographic and a multitude of other publications. Malone does not need to litter his work with nonsense. Most readers have already heard and read â€œthe other sideâ€ in media presentations on the subject since grade school. It is about time the creation viewpoint got more press. I love the way Malone winds up his presentation on pages 102-103. God is the greatest joker in the universe and to destroy most of the evidence for naturalism as He has so cleverly done. The evidence for creation is one of the greatest jokes on â€œintellectualsâ€ who propound the philosophy of Naturalism that I have ever seen. Maloneâ€™s presentation illustrates this humor of God even though he may not realize the extent of how he does it. This book was treat to read.

â€œCensorship of scientific realities that call atheism into question is actively encouraged by the National Academy of Sciences and other professional scientific societies. I commend Bruce for documenting how true science not only unveils Godâ€™s reality as never before but also testifies powerfully to the trustworthiness of Scripture as it relates to the history of life, the earth, and the cosmos.â€ - John Baumgardner, Ph.D, geophysicist, Los Alamos National Laboratory, retired
â€œThe origins issue touches on virtually every area of knowledge and Censored Science does a great job of highlighting all the pivotal issues in a user-friendly, visual way. This book should be a real help to young people who want to put the pervasive evolutionary hype into proper perspective.â€ - Dr. John Sanford, PhD in Plant Genetics, Courtesy Associate Professor of Horticultural Sciences, Cornell University

This is a nice, large quality book for kids and teens! It includes big full color glossy pages on different topics of creation and evolution. It gives you the argument and then gives you the truth on each subject in a short and concise manor. Great for young teens in public school!! I'm an adult and purchased this for myself and my kids to read and for .01 cent, you can't beat it!

2014-15 The Suppressed History of American Banking: How Big Banks Fought Jackson, Killed Lincoln, and Caused the Civil War The Suppressed History of America: The Murder of Meriwether Lewis and the Mysterious Discoveries of the Lewis and Clark Expedition The Censored War: American Visual Experience During World War Two Impounded: Dorothea Lange and the Censored Images of Japanese American Internment Insults!
