Not very long ago I've read an article in one of magazines about what to do if you are in a foreign country and have some unpleasant situations. The author gave a list of probable events and for each item of this list short description of your right responses. This book reminded me the above article "briefness and absence of serious recommendations. I give three stars only to author's work, not to book's content.

This is an awesome book on survival. Am so happy that I came across this great book that gives us great tips on survival skill in case of an injury or a disaster. It guides us on first aid in case of an injury and what one should do. It explains well the basics of prepping and so many things in details. It is well detailed and very informative and more so very easy to comprehend. It is an amazing book.

Impressive read. This is actually a very useful book. I believe we should always hope for the best and prepare for the worst. This book contains lots of value. including prep basics, fire craft, cpr etc. If anything happens, without any internet or phone signal, i can still pull this book out. Five stars

Very good book to give you advice in a disaster situation. It made me think of what I have done to prepare for a disaster situation. So I restocked my first aid and got together enough stuff for a 2 week long stay underground if need be. I wish the book was longer and gave you more info about if you had to stay in your home or if you were disabled and could not go far. Reminded me to update my medical first aide training. Well written and must have for everyone. https://www..com/dp/B01HWGH5VG/ref=cm_cr_ryp_prd_ttl_sol_8

This is a very good book about survival guideline and basic survival activity that we need to know very much, this book is base on a important subject in our modern life cause our world weather changing every day so we are not safe at this time in a moment anything could be happen so we must be alert and this book provide the basic and perfect guideline about survival situations and the guideline for how we can cover come from the situations, after read the entire book I can say that this book is really good and informative for all.

Yes! Disasters are uncertain and we should be prepare to face the situation. Whenever I think of disaster, my mind will be blank. I wanted to come out of this and prepare myself for all kind of disaster. So, one of my friend suggested this book to me. This book taught me how to take care of first aid and other prep tips. If you are like me who is unclear what to do during disaster, then you

must read this book.

I thought this survival guide would go in-depth into the types of disasters that could occur in your life, but it didn't at all.

Impressive! I got this book to help me prepare for the current hurricane season. Once I got the book it turned out to be so much more than just a basic manual. It covers everything that I could possibly need to know in an easy to read format that as a home owner for a disaster. This book has become the one stop guide to preparedness. Really worth recommending!
