Van De Graaff's Photographic Atlas For The Zoology Laboratory

Synopsis

This full-color photographic atlas provides clear photographs and drawings of tissues and organisms similar to specimens seen in a zoology laboratory. This new edition includes many new illustrations, photographs, photomicrographs, and several animal dissections. Taxonomic classifications have been updated to reflect advances in modern understanding of molecular phylogenies. Cladograms are included to assist students in seeing the evolutionary changes of the different phyla. This atlas is designed to accompany any zoology (or biology) text or laboratory manual. Loose-leaf, 3-hole drilled, full-color

Book Information

Ring-bound: 244 pages

Publisher: Morton Publishing Company; 7 edition (January 1, 2013)

Language: English

ISBN-10: 1617310603

ISBN-13: 978-1617310607

Product Dimensions: 10.8 x 8.9 x 0.6 inches

Average Customer Review: 4.7 out of 5 stars 19 customer reviews

Best Sellers Rank: #64,185 in Books (See Top 100 in Books) #23 in Books > Science & Math > Biological Sciences > Biology > Entomology #65 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Zoology

Customer Reviews

Very detailed information, with several graphics images, only issue is that the book is extremely flimsy, it is looseleaf, so needs to be laminated and binded and even then the inside pages are very delicate. Other than that, this book is very good.

Exactly what I needed for my zoology lab. You will need to get a 3-ring binder to put the book in as the book is loose-leaf. The pages tend to rip rather easily, but it was not a major problem.

This was a great lab manual. It had a ton of information. The copy I ordered was in perfect shape and arrived very quickly!

The quality of the material (especially histology slides) has helped a lot in my bio/phys labs.

Was exactly as described, being new and arrived super quick! Will order from them again if needed.
Highly recommended.

Great quality, and very useful Atlas.

as expected - perfect

great pictures with well labeled information. very helpful for zoology lab!
