Modern Business Statistics With Microsoft Excel

Synopsis

Use MODERN BUSINESS STATISTICS, 5E to gain a strong conceptual understanding of statistics with a balance of real-world applications and a focus on the integrated strengths of Microsoft Excel 2013. To ensure your understanding, this best-selling, comprehensive text carefully discusses and clearly develops each statistical technique in a solid application setting. Immediately after each easy-to-follow presentation of a statistical procedure, a subsection discusses how to use Excel to perform the procedure. This integrated approach emphasizes the applications of Excel while focusing on the statistical methodology. Step-by-step instructions and screen captures further clarify the presentation to ensure your understanding. A wealth of timely business examples, proven methods, and application exercises clearly demonstrate how statistical results provide insights into business decisions and present solutions to contemporary business problems. The book's class-tested problem-scenario approach emphasizes how you can apply statistical methods to today's practical business situations. New case problems and self-tests throughout this edition allow you to check your personal understanding. Additional learning resources, including CengageNOW for online homework assistance and a complete support website, provide everything you need to acquire Excel 2013 skills and an understanding of business statistics.

Have the tools you need to

be successful. A variety of tools are available in CengageNOWv2, all combined in one easy-to-use resource designed to improve your grades. Some resources get you prepared for class and help you succeed on homework, and others show you specific areas where you can work to improve. Stay ahead of the course requirements. CengageNOWv2 shows you the path through your course from first day through finals. Once you know what's expected, it's easier to complete your assignments. Gain understanding that stays with you. Do well on tests as well as on the assignments! Bridge the gap between homework and tests by using CengageNOWv2 to truly understand the material. Self-study and review materials keep you on the right track, to make sure your understanding goes beyond memorization. Set yourself up for better grades. Why wonder where you stand? CengageNOWv2 includes trackable assignments and grades. It tells you what to do to improve your grade, and gives you the tools to accomplish it!

Dr. David R. Anderson is a textbook author and Professor Emeritus of Quantitative Analysis in the College of Business Administration at the University of Cincinnati. He has served as head of the Department of Quantitative Analysis and Operations Management and as Associate Dean of the College of Business Administration. He was also coordinator of the College's first Executive Program. In addition to introductory statistics for business students, Dr. Anderson has taught graduate-level courses in regression analysis, multivariate analysis, and management science. He also has taught statistical courses at the Department of Labor in Washington, D.C. Professor Anderson has received numerous honors for excellence in teaching and service to student organizations. He is the coauthor of ten textbooks related to decision sciences and actively consults with businesses in the areas of sampling and statistical methods. Born in Grand Forks, North Dakota, he earned his BS, MS, and PhD degrees from Purdue University.

Dr. Dennis J. Sweeney is a leading textbook author, Professor Emeritus of Quantitative Analysis, and founder of the Center for Productivity Improvement at the University of Cincinnati. He also served five years as head of the Department of Quantitative Analysis and four years as Associate Dean of the College of Business Administration. In addition, Dr. Sweeney has worked in the management science group at Procter & Gamble and has been a visiting professor at Duke University. Dr. Sweeney has published more than 30 articles in the area of management science and statistics. The National Science Foundation, IBM, Procter & Gamble, Federated Department Stores, Kroger, and Cincinnati Gas & Electric have funded his research, which has been published in Management Science, Operations Research, Mathematical Programming, Decision Sciences, and other respected journals. Dr.

Sweeney is the co-author of ten textbooks in the areas of statistics, management science, linear programming, and production and operations management. Born in Des Moines, Iowa, he earned a B.S. degree from Drake University, graduating summa cum laude. He received his M.B.A. and D.B.A. degrees from Indiana University, where he was an NDEA Fellow. Dr. Thomas A. Williams is a well respected textbook author and Professor Emeritus of Management Science in the College of Business at Rochester Institute of Technology, where he was the first chairman of the Decision Sciences Department. He taught courses in management science and statistics, as well as graduate courses in regression and decision analysis. Before joining the College of Business at RIT, Dr. Williams served for seven years as a faculty member in the College of Business Administration at the University of Cincinnati, where he developed the undergraduate program in Information Systems and served as its coordinator. The co-author of 11 leading textbooks in the areas of management science, statistics, production and operations management, and mathematics, Dr. Williams has been a consultant for numerous Fortune 500 companies and has worked on projects ranging from the use of data analysis to the development of large-scale regression models. He earned his B.S. degree at Clarkson University and completed his graduate work at Rensselaer Polytechnic Institute, where he received his M.S. and Ph.D. degrees.

A good reference, but a terrible textbook. It's like a glossary with equations. The book is poorly laid out, referenced examples are usually far from the text and one has to go hunting them down and flip back and forth. It's statistics, not rocket surgery; it should never be hard to understand. The things covered in the text are easily summarized and can be explained very directly and simply by better writers or teachers.

I needed this for one of my business classes. So I rented a copy and received a great barely used copy. It helped me through the class and I would recommend it to anyone looking for textbooks for a low price!

Bought for school

as expected

Used it for my business statistics class. Professor was useless, didn't know how to teach. Had to teach myself with the book. Very useful

This is a great book but It's not a simple easy book to understand. You have to read it 2 or more times to understand the stuff but it is great for any business students.

Excellent book but the eBook does not come with Excel. Sucks!

This is an excellent book. It has many pictures and steps for you to follow in excel. I walked away from this class with a tremendously improved understanding of both statistics and excel, mostly due to this text.
