Statistics For Management And Economics

Synopsis

STATISTICS FOR MANAGEMENT AND ECONOMICS, Tenth Edition, emphasizes applications over calculation. It illustrates how vital statistical methods and tools are for today's managers--and teaches you how to apply them to real business problems. Using a proven three-step "ICI" approach to problem solving, the text teaches you how to IDENTIFY the correct statistical technique by focusing on the problem objective and data type; how to COMPUTE the statistics doing them by hand, using Excel, or using MINITAB; and how to INTERPRET results in the context of the problem. This unique approach enhances your comprehension and practical skills. The text's vast assortment of data-driven examples, exercises, and cases covers the various functional areas of business, demonstrating the statistical applications that marketing managers, financial analysts, accountants, economists, and others use. These comprehensive applications give you hands-on practice, while solid pedagogical elements make the material more accessible and easy to apply to your world. Completely up-to-date, the tenth edition offers comprehensive coverage, current examples, and Excel 2013 and MINITAB 16 content.

Book Information

Hardcover: 992 pages

Publisher: South-Western College Pub; 10 edition (January 1, 2014)

Language: English

ISBN-10: 1285425456

ISBN-13: 978-1285425450

Product Dimensions: 10 x 8.2 x 1.4 inches

Customer Reviews

Dr. Gerald Keller is Emeritus Professor of Business at Wilfrid Laurier University, where he taught statistics, management science, and operations management from 1974 to 2011. He also taught at the University of Toronto, the University of Miami, McMaster University, the University of Windsor, and the Beijing Institute of Science and Technology. In addition to consulting with banks on credit scoring and credit card fraud, Dr. Keller has conducted market surveys for the Canadian

government on energy conservation. His books include BSTAT, 2e, APPLIED STATISTICS WITH MICROSOFT EXCEL, ESSENTIALS OF BUSINESS STATISTICS (co-authored), AUSTRALIAN BUSINESS STATISTICS (co-authored), and STATISTICS LABORATORY MANUAL EXPERIMENTS USING MINITAB. Dr. Keller also has been published in OMEGA, IIE TRANSACTIONS, DECISION SCIENCES, INFOR, ECONOMICS LETTERS, and ARCHIVES OF SURGERY.

It seems as though there was an error printing my book, because I am missing whole pages or problems that are required for my class. Cenage has no customer service to contact, so as of now it looks like I will fail this assignment due to the poor printing. So far I have found 10+ pages of problems that are not included because of this malfunction. I get accidents happen, but to have NO customer service to help is RIDICULOUS.

Excellent

It is a required text for a statistics class.

There was damage on the cover of financial accounting cover. Please see photo.

I just started this book, but I think I am going to actually be able to learn the ins and outs of statistics by using this book.... unlike the previous statistics book I had to use in class. There are a lot of hands on exercises which I think will be extremely beneficial in the learning process.

Great Book . I was completely lost by my instructor throughout the semester . This is the first " math " book I've been able to open and teach myself . Great book

This book is great substitute for the US book. All the same problems and examples.

Most difficult class ever but thanks to this book now I can say that statistics is easy. I recommend you look for an easy professor that helps a lot
