## Customer Reviews

As you'll see from the reviews of each book below, I think this is a really wonderful series. If you're new to it then you do need to start with books 1-3 (luckily also available in a reduced price collection), but I can pretty much guarantee you'll get hooked and will want to read this next trilogy.Now comes simple math. Individually each of these books sells for \$3.99. This trilogy collection sells for 99¢. That means that if you haven't read any of the three books here the trilogy is a bargain. If you've not read all three it's a steal.The books range in their ratings (all at least 4 stars). Collectively at the reduced price they are easily a 5 star bargain.Here are those promised reviews:The Beginning of the End - Book 4:This has been a wild ride of a series, epic

space opera on a grand scale with Greek mythology mixed in but somehow really working together beautifully. The Beginning of the End keeps things going perfectly. The plot and characters increasingly layered and complex, the adventure full of twists and turns, losses and victories. The writing consistently excellent. I'm having a ball with the Universe in Flames and this particular book, which is highly recommended. Rise of the Ultra Fury - Book 5: It's really incredible how the layers of complexity in both plot and characters keep going on hyper-drive in the fantastic mashup of grand sci fi space opera and Greek mythology that is Universe in Flame. Here we have Sarah's pregnancy and Chase's near death in the underworld while Ryonna is desperately searching for her brother-in-law - needed as the Furies massive space fleet (how often do you see THAT mix??) is gonna put the whammy on the Earth Alliance. That enough for you? There's plenty more where it comes from. I frankly don't know how Christian Kallias can pull it off so well yet keep the series - and this book - going so strong in a fundamentally fun way. But somehow he does it, so once again for a book in this series, this one is highly recommended. Shadows of Olympus - Book 6: OMG. Asgardians and Olympians (we are talking Zeus here, folks) in a Space Opera of epic scale as the Earth Alliance fends off annihilation by the freakin' Furies. How often can a write something like that - and actually be referring to a series and, here it's most recent book, Shadows of Olympus, as a really well written and highly enjoyable work that's not remotely some sort of a spoof or farce? Yes indeed, Christian Kallias is a master at this stuff. High adventure plus wonderfully developed characters. Thrills, defeats and victories. Overwhelmingly fun - and highly recommended.

Continuing with the difficult and hostile family dynamic between Chase and Argos, Chase is now given the ultimatum to join his people in conquering the universe or be forever declared an enemy. Chase was concerned about the potential strength of so many Furies united together, when just fighting his brother *Asmodeus* -- had been almost impossible. He felt overwhelmed and hopeless. But somehow, he must gather his inner strength, rely on his friends and allies, and overcome his own fears. He must pull on his own developing powers to fight them. He can't let this destruction happen! With the guidance of Ares, Chase seeks the light inside himself. Though very small, he focuses on it, trying to unleash his power. His own thoughts could make it real if he could just believe it; but the fear and destruction kept hammering in his mind, distracting him from what he had to do. As with each one of us, our own worst enemy is ourself, the most difficult of all to overcome. Ares gave him visions of a possible future outcome, with the warning that whatever happened in the vision would affect the reality of the real world. Sarah and his child depended on him to save them *Asmodeus* -- their death in the vision was imminent;

and the universe waited to see if he would be empowered to find a way to rise and face the threat. With a roar of anger, his power surged through him and he took on the five Furies who attacked his family. The power continued to swell. Maybe at last there was hope? More incredible action sequences come to play in this portion of the Universe in Flames Trilogy! Shocking twists and turns, fast pacing, and edge-of-your-seat suspense keeps the reader plowing forward in a universe of danger and excitement! The blend of ancient gods and goddesses juxtaposed with futuristic space travel creates a unique world for the reader to explore and experience. It is truly incredible and the excellent writing really does fully draw the reader into the story and realism. If you read no other such book, grab up your copies of this series and stay with it! It is amazing and you will love every exciting minute of it!

With the second half trilogy (books 4 - 6) of Universe In Flames, Kallias has established a new level of excellence in sci-fi writing. Whether it is character background development, complex plot twists or totally out of the box story lines, Kallias delivers the greatest writing performance this century! There have been some great series of books made into movies in the past fifty years with the Star Wars series, the Harry Potter series and the J.R. Tolkien series of books, but none of these will hold a candle to the Universe In Flames series when it hits the silver screen. Never has a series of books grabbed my attention as this series and I doubt that we will ever see another. 5 stars worth of kudos (because they don't let us award 6 stars) to Kallias!
