When I feel this I feel like I am back in college reading a textbook.

Helpful for anyone thinking about breeding

Excellent product. Great vendor.

This book is an excellent resource for new breeders as well as a helpful guide to more seasoned breeders. It contains valuable information on pre-pregnancy issues and considerations as well as extremely useful information regarding the whelping and post-whelping processes. Diagrams and pictures also help readers understand specific processes and events, especially concerning the whelping process. This book is not written to educate readers regarding the breeding process of specific breeds and is an excellent resource for general information. The author writes in a clear and concise manner and the book is organized well enough to use as a quick reference in a hurry. Additionally, the book is not antagonistic nor does it contain personal bias' as many other books on this topic seem to. The author is very straightforward and gives clear information backed by fact without offering opinion or incessant diatribe. The book's organization also allows readers to pick it up and read about specific topics as necessary rather than requiring a cover-to-cover reading experience.

I bought this book specifically to review the whelping section for clients who are beginner breeders (at least on the female side, they have always had stud dogs) and found direct, succinct advice that was easy to read. This is a great reference for beginners/novice breeders, but make sure that you contact your veterinarian if you have any questions or concerns, and let them know what materials you are reading.

This is a great start! My boyfriend and I are going to breed our chocolate lab and this really helped

us figure out how to get started. It doesn't get incredibly specific but it's perfect for an amateur looking to go pro!

Well written and helpful. Made me think twice about actually stepping into the dog-breeding world. Breeding is best left to professionals.

Great info for someone just starting out! Lots of information.
