Ford Farm Tractors Of The 1950s (Enthusiast Color)

Synopsis

Step inside the colorful history of Ford tractors. The author offers insight into the design, production, and marketing of Ford tractors, and comments on the interplay between Ford's U.S. division and its British division. Evocative photography of restored and factory-original examples depicts the classics that Ford first produced. Included are the 8N, the NAA or "Jubilee," the Fordson Major, diesel-powered New Major, the 600, 700, 800 and 900 Series, and the three-cylinder Dexta. Many rare tractors you won't find in other books are featured.

Randy Leffingwell wrote his first book, *American Muscle*, in 1989 while still on staff at the Los Angeles Times. Since then, he has authored another 47 titles for Motorbooks and sister publisher Voyageur Press, including his most recent *Complete Book of Porsche 911 and Corvette 60 Years*. He has just finished *Porsche 911: Fifty Years*, a reexamination of the 911 story based on nearly two dozen new interviews. He lives in southern California, about 100 miles north of Los Angeles.

ok

My husband is working on getting an older tractor to run. So he was very interested in the book.

ok

easy seller to work with AAAAA!!!!

I was searching one day for books and put my Dad's name into the search field. To my surprise, four books popped up written by Randy Leffingwell with mention of my Dad in them. My Dad passed away in 2005 after a very courageous battle with cancer. I purchased these books immediately so that I could read what he had written about my Dad. Anyone that had the opportunity to have met my Dad always had a lasting impression of him. So, thank you Randy for remembering a wonderful & knowledgeable man.

A very informative book for anyone interested in the evolution of the Ford tractor. Loaded with color photos. I would recommend this book for restorers and early tractor enthusiasts.

Lavishly embellished with archive photos and drawings, Ford Farm Tractors gives the Ford enthusiast copious information about the design and development of the Ford tractor line. From Ford's early attempts at traction power to the latest New Holland offerings, the author provides enough details to satisfy most information-hungry Ford lovers. Full-color photographs of collector tractors, working tractors and implements provide ample details for restorers and hobbyists alike. There are some minor editing details, such as a few mis-captioned pictures and the inclusion of several previously published photos that detract from this otherwise beautiful, useful and welcome addition to the tractor-enthusiast's library or coffee table.

I like these Ford books.
