# Negotiating Business Transactions: An Extended Simulation Course (Aspen Coursebook)

## Synopsis

The only offering of its kind, *Negotiating Business Transactions: An Extended Simulation Course* contains facts and contextual materials, negotiating instructions for each side, and background readings on all aspects of the transaction. The text is an introduction to both negotiations and transactional legal practice, and meets the ABA practical skills requirements. By bringing a business deal into the classroom, the text helps students study objectives, structures, and strategies and learn by doing in a setting where mistakes become lessons--not malpractice. The text enables students to develop negotiating and drafting skills as they experience the "real time" challenges of negotiating deals. Students explore the interaction between business and legal issues in the context of structuring those deals. Then, they can apply what they have learned to produce a solution that meets the client's objectives and is acceptable to the counterparty. Finally, by understanding the social and environmental impacts of business transactions, students can more fully explore issues of professional responsibility in negotiations. Student response has been consistently and overwhelmingly positive. ## Customer Reviews

It is a fairly decent approach to the concept of negotiation, but the entire book centers on one simulation and uses terminology that I have never heard elsewhere in regards to approaches to negotiations. I think the book would have benefited from additional simulation exercises rather than just one seeing as you are not likely going to always be thrown into this type of negotiation; rendering a great deal of the recommendations useless in the real world unless you are looking to focus solely on corporate law.

Well-made course, Book was in good condition
