## Customer Reviews

I love these pictures. You can get lost in them, like the night sky or the flames of a fire. At times I saw dancers in jewel-toned smoke, or sparkling fireworks winking across the sky. There were a few that looked like fine lace, but as if grown organically, like flowers. The art on these pages is perfect for meditation and reflection. A little time spent with Fractal Flames Dazzling should lift any mood.

Kindle Unlimited, but for all this writer's newer fractals is the ku, all are available for purchase as well. Fractals are curve/geometric figure, and there are also flame fractals which are somewhat different type. This book seems to be a bit disjointed for me. Some of the images are meh, some are really great. There is no specific color tone or pattern in this book. Some of the images are black, others white or a huge array of bright colors. The one thing that connects the series is the same beige fabric background. While some images look great with that specific background, others lost their impact in my opinion. Furthermore, the fact that the exact same background is used in each page of the book became tiring after a while. Luckily it doesn't have any formatting issues.

These images are awesome. I love art or creative things in all their forms. I don't know how they are done but they are beautiful and really cool to look at. The designs and colors are really cool. If you like art in a new form then you will like these. I only have one thing left to say More Please.

Beautiful! Great designs. Vibrant colors. Wonderful artwork. I thoroughly enjoyed this book, it was different than normal books, but worth the experience.

These were full of different colors and shapes. It always amazes me at how beautiful the pictures are and what you can find hidden in them.

Put on the music and relax. Enjoy the results of Mother Nature. I pick up all of these books, just to see the different results. Enjoy!

What beautiful photos by John Pirillo. They also seemed to have a calming effect. You should try one, you might enjoy them as much as I do. Good work John.
