Customer Reviews

"These flash cards are an excellent educational tool that will help students at all levels. I would recommend them to my anatomy students. They are comparable to Anatomy Flash Cards: Anatomy on the Go, Gilroy (Thieme, 2008)) in content, but the latter has a better online resource that allows students to study each illustration with or without labels, along with a self-testing feature.

Nevertheless, this second edition of the Gray's flash cards is a very worthwhile update of a valuable student resource. Weighted Numerical Score: 100 - 5 Stars!" - Jill E. Feinstein, M.S.(Richland

Community College), Doodyâ™s Review

I bought one set of notecards but for some reason, I received 10 sets of the same 36 cards. I thought I was going crazy but it seems I received 10 sets of notecards 59-64, 123-128, 188-192, 253-258, 317-322, including some student consult cards and title cards. Also I was lucky enough to find one set of the notecards 380-391. I hope I am able to get a replacement in time for my upcoming exam.

This is an incredibly useful learning tool for students. I love how organized the pages are and it also comes with a code for the online learning software. If your a student get this and you'll never regret it. Forget you class textbooc beacause it won't even comapre.

Love them.

Excellent purchase. Great price.

Not as expected to contain the necessary info needed.

The book is much better!

It's great for fast proceed in pregradual anatomy. Missing latin nomenclature, but it worth translating it myself, so I learn latin and anatomy at once. And even english as a foreigner.
