The Story Of Civilization Volume I: The Ancient World

Synopsis

Children should not just read about history, they should live it. In *The Story of Civilization*, the ancient stories that have shaped humanity come alive like never before. Author Phillip Campbell uses his historical expertise and story-telling ability together in tandem to present the content in a fresh and thrilling way. *The Story of Civilization* reflects a new emphasis in presenting the history of the world as a thrilling and compelling narrative. Within each chapter, children will encounter short stories that place them directly in the shoes of historical figures, both famous and ordinary, as they live through legendary battles and invasions, philosophical debates, the construction of architectural wonders, the discovery of new inventions and sciences, and the exploration of the world. Volume I, *The Ancient World*, begins the journey, covering the time periods from the dawn of history and the early nomads, to the conversion of Emperor Constantine. Children will learn what life was like in the ancient civilizations of Egypt, Mesopotamia, Persia, Greece, Rome, and more, as well as learn the Old Testament stories of the Israelites and the coming of Christ. The strength of the content lies not only in the storybook delivery of it, but also in the way it presents history through the faithful prism of the Church. Have you always wanted your children to learn about world history from a Catholic perspective? Here, you'll have the trusted resource you've always wanted.

Customer Reviews

We bought the audio version of "The Story of Civilization" to play in our car on trips for the children, ages 6 and 9. Very well done audio book, with action scenes, human interest highlights, and lots of sound effects to keep everyone interested. Everyone in the car listened and learned a lot (even the

parents), and that dead time between places on our trip was kept vibrantly alive! Excellent history lessons, so we will be buying Volume II as soon as it is out in the spring. Highly recommended for educational, as well as recreational listening.

We have used Story of the World in our homeschooling...until now! Finally a great history resource from a Catholic worldview. It isn't a "textbook" but a highly enjoyable and well written adventure through history! Even the audio recording is superior, as it is a dramatized version that is highly engaging for the kids and flows beautifully. We are looking forward to volume 2.

As homeschoolers we love the ability to get super involved in a subject and let that topic fill our children's imaginations as they discuss and think about it for weeks at a time. "The Story of Civilization" Volume One was so well done, not only on the CD, but with the associated posters, textbooks, and activity books and teacher guide. The kids (ages 3-9) cheered to get in the car and became engrossed in the storytelling every time. They were so proud of their crafts and reciting their history lessons to their dad at dinner, it was wonderful for the whole family! As the kids would finish a disk, they would "lend" it to dad to listen to on his way to work. A trip to soccer, the Y, or a doctor's visit could all be made more enjoyable, educational, and fun with this wonderfully well done series. It was so amazing we got the "Story of the Bible" and "Story of Civilization Vol II." All three were great investments into our family's education and an answer to prayer!

Our family loves this entertaining, yet educational story of ancient history. While our favorite is to enjoy the audio cd version in the car, it is wonderful to have the written text for storytime and study. I often catch my daughters looking through this on their own time. This is our favorite of the history "spines" (CHOTW, SOTW, etc.).

It's alright, but I didn't find it as comprehensive and preferable as the tried-and-true The Story of the World: History for the Classical Child: Volume 1: Ancient Times: From the Earliest Nomads to the Last Roman Emperor. I was sorry I spent the money on it as it doesn't offer an improvement to materials already available.
