# Human Biology

## Synopsis

Clear, engaging, and visually compelling, Starr and McMillan's HUMAN BIOLOGY teaches you the core concepts of human biology and prepares you to make well-informed decisions in your life. Each chapter opens with an application that highlights the relevance of biology and motivates the study of the topic. You then learn basic concepts which help you think critically about these issues. Useful learning aids, such as section-ending "Take-Home Messages" and a running glossary help you understand key concepts. At the end of the chapter, "Your Future" and "Explore on Your Own" sections demonstrate the impact and personal relevance of the content on your life. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>.

## Book Information

Paperback: 608 pages

Publisher: Brooks Cole; 11 edition (January 1, 2015)

Language: English

ISBN-10: 1305112105

ISBN-13: 978-1305112100

Product Dimensions: 8.9 x 0.9 x 10.8 inches

Shipping Weight: 2.5 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 5 customer reviews

Best Sellers Rank: #32,396 in Books (See Top 100 in Books) #28 in Books > Science & Math > Biological Sciences > Animals > Mammals #152 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Anatomy & Physiology #208 in Books > Science & Math > Biological Sciences > Anatomy

## Customer Reviews

For two decades, Cecie Starr secured her place as one of the bestselling biology textbook authors. Her texts, appreciated for their clarity in both the written word and the visual representation of biological concepts, include multiple editions of BIOLOGY: THE UNITY AND DIVERSITY OF LIFE, BIOLOGY: CONCEPTS AND APPLICATIONS, and BIOLOGY TODAY AND TOMORROW. Her original dream was to become an architect, but now, instead of building houses, she builds -- with care and attention to detail -- incredible texts based on this philosophy: "I invite students into a chapter through an intriguing story. Once inside, they get the great windows that biologists construct on the world of life. Biology is not just another house. It is a conceptual mansion. I hope to do it justice." Beverly McMillan has been a science writer for more than 25 years and is coauthor of a

college text in human biology, now in its eighth edition. She was worked extensively in educational and commercial publishing, including 8 years in editorial management positions in the college divisions of Random House and McGraw-Hill. In a multifaceted freelance career, Bev also has written or coauthored 10 trade books, as well as story panels for exhibitions at the Science Museum of Virginia and the San Francisco Exploratorium. She has worked as a radio producer and speechwriter for the University of California system and as science writer and media relations advisor for the Virginia Institute of Marine Science of the College of William and Mary. She holds undergraduate and graduate degrees from the University of California, Berkeley.

It has all the information for an introductory course as needed.

It was the wrong book. The instructor wanted a different book. But I'm pretty sure that it's a good book.

Very informative.

Gray condition!!!

Worked great for my class. Cheaper than buying.
