Disappointed in both the fact that there are so few ideas and that the ideas are not all that impressive. Plans are lacking also.

This book is great! My husband and I have no experience in the home improvement or construction areas. This book was amazing. It lists the tools you will need for the projects in the beginning. Then for each project it lists the materials required. Each project is written step by step in an easy to follow format. It is easy to alter the directions to fit your space requirements in your home. There is even conversion charts in the back. Compared to chemistry lab, these projects were easy. I suggest them to any pet owner wanting to save a few bucks and have the pride to say "I built that". I wish there was a sequel.

The book has some fairly easy builds for even the beginner builder. I found a few projects to start immediately.

I highly recommend this book to the do it yourselfer. This does not have projects for those without prior experience building things, however. It is really neat ask the ideas they came up with for pet habitats to create.

Have not attempted any of the projects yet, however I did read through the book and found it detailed and helpful. It gives some great ideas for weekend projects for all of us DIYers.

I absolutely love this book! We have made almost every project in in and our fur babies could not be happier!! They also love there new beds, trees, climber, post and bird houses! Next we are doing the bunny hutch! If you have a little time and love your pets this is the book for you! Very east to follow directions!

This is a good book and well illustrated. I have pets and this book has good ideas to make the most of the furniture without spending too much. You can do it yourself! Good!

really cute ideas, can't wait to try some
