A Beetle Is Shy

Synopsis

The award-winning duo of Dianna Hutts Aston and Sylvia Long team up again, this time creating a gorgeous look at the fascinating world of beetles. From flea beetles to bombardier beetles, an incredible variety of these beloved bugs are showcased here in all their splendor. Poetic in voice and elegant in design, this carefully researched and visually striking book is perfect for sparking children's imaginations in both classroom reading circles and home libraries.

Customer Reviews

K-Gr 4 "The author/illustrator pair have created yet another colorful and intricate work. The combination of Aston's soft text and Long's watercolors provide readers with an enjoyable insight into the world of beetles. Text presented in a sweeping cursive font introduces a general statement about beetles ("A beetle is telegraphic"), while text rendered in a smaller, nonscript font expands on this trait or ability ("Most beetles send messages to each other using chemicals called pheromonesâ |. Others 'talk' to each other with squeaky, raspy soundsâ |"). Several illustrations depict the beetle species in their natural environments (a boll weevil munching on a plant), while others juxtapose everyday items with the insect to give a sense of size perspective (the North American featherwing beetle and the eye of a needle). Each species is labeled, and the endpapers feature an illustrated free-form list of all the beetles pictured. The only thing that could make this

book better would be a glossary of the beetles with additional information for the curious child.
VERDICT Children and adults will love this beautiful and fascinating book.â "Gretchen Crowley,

"A sparkling homage to a diverse category of insect."-Publishers Weekly, starred review"Children
and adults will love this beautiful and fascinating book."-School Library Journal"This delightful book
promotes a sense of wonder about a group of little creatures with whom we share this
Earth."--Science Magazine

I learned about this book on the AAAS 2016 best science books for kids list and it did not
disappoint! Gorgeous and accurate artwork with beautiful depictions of developmental stages in
beetles. My 18 month old loves it for the artwork now and I know will love it for the details as she
grows up.

Can't wait to give this as a Christmas present! Gorgeous illustrations and learning material!

I adore Dianna Hutts Aston's books.

My favorite books!

Beautiful!

amazing art and full of great facts, my kids love this book!

Good Product

I never knew beetles could be so colorful! Well, in A BETTLE IS SHY, the reader finds out what
wonderful types of beetles there are. Some are dull colored, but others are really pretty. There's
even a section called, "A Beele is Tasty." There, we found out about Roasted Palm Weevil Larvae,"
or even "Larvae Soup!" Yummm!! never knew beetles could swim, or could communicate, or that
there are prehistoric. Well, now I know!This is one fascinating book. Tons of interesting bits of
information that will amaze readers. This is a very informative book, in a fun way.Of course, A
BEETLE IS SHY is full of absolutely beautiful illustrations! Every page is filled with stunning artwork.

My favorite illustration is the huge illustration of the "Spotted Tortoise Beetle." Kids will be lost in this book for hours at a time. A BETTLE IS SHY is flat out a FUN book. Sample Beetle for impartial review. However, the publisher neglected to send me some Beetle Larvae soup!
